

CONFIDENTIAL

DD/S&T-2298-63

4 December 1963

MEMORANDUM FOR: Director, Foreign Missile and Space
Analysis Center

SUBJECT: NIKE X Panel

General Carter called me this morning to relay a call he had from Secretary Hawkins of the Army. It seems that they are taking a leisurely look at NIKE X and will hope to conclude this about October 1964. Hawkins has desired to establish a monthly review of this program and, through Fitch, wondered if you could join them as a knowledgeable member of this panel. I think they are counting specifically on you having information on Soviet ABM and ICBM re-entry vehicles, which you should have at your fingertips. I consider this a very favorable appointment and one which can begin to build a professional relationship with DOD, and I hope that you can take it on.
